---

The background of the image is a reproduction of the painting 'The Starry Night' by Vincent van Gogh. It features a turbulent, swirling blue sky filled with bright, glowing yellow stars and a large, luminous crescent moon. In the foreground, a dark, jagged cypress tree stands on the left, and a small town with a church spire is visible at the bottom. The overall mood is one of awe and wonder.

Imagination is more  
important than knowledge

Albert Einstein

## Painter

[Vincent Willem van Gogh](#) (1853 – 1890) was a Dutch Post-Impressionist painter who is among the most famous and influential figures in the history of Western art. In just over a decade, he created approximately 2100 artworks, including around 860 oil paintings, most of them in the last two years of his life. His oeuvre includes landscapes, still lifes, portraits, and self-portraits, most of which are characterized by bold colors and dramatic brushwork that contributed to the rise of expressionism in modern art. Van Gogh's work was beginning to gain critical attention before he died from a self-inflicted gunshot at age 37. During his lifetime, only one of Van Gogh's paintings, The Red Vineyard, was sold. (information from Wikipedia).

You can take a look at Van Gogh's museum in Amsterdam here: <https://www.vangoghmuseum.nl/en>

## Painting

The Starry night (1889)

This painting is in the MoMa Museum, you can read more here: <https://www.moma.org/collection/works/79802>

## Quotation

[Albert Einstein](#) (1879 – 1955) was a German-born theoretical physicist who is widely held as one of the most influential scientists. Best known for developing the theory of relativity, Einstein also made important contributions to quantum mechanics. His mass–energy equivalence formula  $E = mc^2$ , which arises from relativity theory, has been called "the world's most famous equation". He received the 1921 Nobel Prize in Physics "for his services to theoretical physics, and especially for his discovery of the law of the photoelectric effect", a pivotal step in the development of quantum theory. His intellectual achievements and originality have made the word Einstein broadly synonymous with genius. (information from Wikipedia).
